

# **CAMCO-WET XDF**

## **DESCRIPTION:**

**CAMCO-WET XDF** is a clear, light-yellow colored liquid with an extremely low-foaming profile. **CAMCO-WET XDF** greatly enhances the cleaning power of your caustic solutions while simultaneously reducing or controlling the foam levels in your CIP or cleaning system.

## **PROPERTIES**

- pH of a 1% solution is nearly neutral
- Extra low foaming profile
- Contains a very powerful defoamer
- Disperses oily residues
- Rapid, film-free rinsing
- Stable in concentrated caustic systems
- High temperature stable

## **USE LEVELS:**

While each cleaning application, soil load, and system is different, the typical use level is approximately 2 gallons of **CAMCO-WET XDF** per 100-gallons of liquid caustic soda.

## **BENEFITS:**

- SIGNIFICANTLY reduce the amount of caustic required to clean. Typically, caustic levels necessary to achieve efficient cleaning will be reduced by 20-50% or more, depending on your system and current levels.
- Reduced time necessary for cleaning
- Reduced foaming issues
- Quicker, easier rinsing. Potentially reduce water usage and effluent.

## **CONTAINERS:**

**CAMCO-WET XDF** is available in 450# drums, 275-gallon and 330 gallon totes, and bulk.
