

EZ-CLEAN Ag

Description:

EZ-CLEAN Ag is a chlorinated, high-foaming alkaline cleaner designed for foam, soak, or pressure cleaning applications in porcine and other agribusiness operations. **EZ-CLEAN Ag** quickly and easily removes organic soils, protein films, stains, odors, and fatty/greasy deposits. **EZ-CLEAN Ag** rinses quickly and easily and leaves no hard water films. **EZ-CLEAN Ag** was formulated with the needs of agribusiness in mind and uses only biodegradable components.

Typical properties:

- High foaming for ease in application and use.
- Alkaline for aid in removal of heavy duty soils
- Chlorinated for protein removal, stain removal, and odor reduction.
- Contains powerful detergents for foaming, rinsing, and soil suspension properties.
- Water conditioners aid in hardness control.
- Biodegradable, will not harm pits.

Uses:

EZ-CLEAN Ag was designed to be used through foam generation equipment, or through pressure or manual spray applications. **EZ-CLEAN Ag** can be used anywhere heavy duty cleaning may be needed. Ideal for cleaning of pens, barns, floors, walls, and miscellaneous equipment.

How to use:

If possible, pre-rinse area or remove any large soil deposits. This will minimize cleaner use, maximize effectiveness, and save on overall expense. Prepare appropriate dilution and apply a thorough blanket of foam to equipment or area(s) to be cleaned. Allow foam to "cling" for 10-20 minutes, but do not allow to dry. Initial foam should be thick like shaving cream. Rinse thoroughly with pressure spray or other fresh water. See your local rep for detailed instructions on your specific facility and needs.

Containers:

EZ-CLEAN Ag is available in multiple container sizes. Consult your local representative for assistance in selecting the best size for you. Store containers closed in a cool, dry area to maximize shelf-life.
